"By the way, I loved the Site Water Management class. Thank you so much for hooking me up with it. I'm already using it, and I've ordered the upgraded version of the CD. This is going to allow our business to step more gracefully into the water management specialty I've wanted to pursue for quite awhile. I've attended other water management classes, but they don't really teach you how to understand water use and the business end of it like Tim Wilson does. His system is smooth and elegant, and easy to use. Can you tell I'm excited?"

Lori Palmquist, CIC, CLIA, CWCM-L, Oakland, CA

"As a contractor I found this class to be just what I needed, just in time. More and more my company is being asked to provide water management planning services. While I had a good idea of the basic concepts, this class laid out the entire procedure step by step and provided me with great real world techniques to produce a professional plan for my customers. The computer spreadsheets did all of the calculations for me and produced clear tables and graphs"

Don Blackwell, Irrigation Contractor

Class will be held at the Water Smart Innovation conference

Class cost is \$150.00 and includes book, CD and handouts

Payment maybe be by check. please mail checks to:

Irrigation Water Management Society

2008 Sycamore Dr.
